SUMMARY

Architect turned product designer who designs and builds AI tools for architecture, engineering and construction. Bachelor of Architecture from SPA New Delhi (second best thesis; Charles Correa Gold Medal finalist), trained at Vastu Shilpa Consultants under B.V. Doshi, then Master of Design in Interaction Design at IDC School of Design, IIT Bombay (CEED All India Rank 4). Built **Counterweight**, a design-review tool that reads IFC models and measures early options instead of guessing, and shipped AI agents used by **10,000+ learners**. Fluent in both the drawing set and the codebase.

EXPERIENCE

Product Designer | Airtribe | 2026 – Present

- Designed and built **Kai**, an AI lesson agent reaching **10,000+ learners**, which plans a lesson rather than answering a question: intake, a written lesson with cited sources, and a concept map drawn as you read. Full-stack, AI-assisted.
- Designed and co-built an **accountability and planning agent (1,500+ users)**, turning ambiguous LLM behaviour into interface states a user can trust.
- Authored the **AI design-language skill** the learning-design team writes inside: eight behaviour families instead of a component library. Carries **~50 lessons across 3 courses**; **60% of 420 surveyed** called the format more engaging.
- Moved company payments out of a Google Sheet into internal tooling for **200+ internal users**, in three phases without downtime. Designed the payment state model (6 types, 11 statuses) and role-based permissions across 11 categories.

Product Designer, Program Associate | Wells Fargo | 2025 – 2026

- Led the UX audit and information architecture overhaul for Retail Services PLCC and Pay-On, serving **3.8M customers** and ~120K monthly service calls at $11.37 each. Cut **9 pages to 4**.
- Shipped under policy, legal and WCAG review: rescued Practice Finance from decommission by consolidating 6+ pages into one compliant landing page, and moved the annual ESG report from PDF to a responsive web experience across 6 breakpoints. Both live on wellsfargo.com.

Product and Service Designer | Kochi Metro Rail Ltd. and Kerala Water Metro | 2023 – 2024

- Ran an end-to-end service design study of Kochi's multimodal transport and delivered policy recommendations to government stakeholders.
- Redesigned the official Kochi1 app around travel intention. Usability tested with **16 participants**: **SUS 80**, 100% completion on two of three tasks, NASA-TLX 53.8; 9 of 16 never recognised the greener routes, which redirected the sustainability layer.

Architectural Design Intern | Vastu Shilpa Consultants | 2022

- Documentation and design visualisation for institutional projects, under Padma Bhushan B.V. Doshi.

PROJECTS

- **Counterweight** (2026) — a design-review tool for architects that compares early options on the everyday failures found after handover, and only says what each drawing can support. Reads IFC files, measures overlook and bin routes from the model's geometry, and never turns an AI render into a number. TypeScript, React, three.js, web-ifc; **91 automated tests, 15 of 15 planted bugs caught**.
- **Madipur General Hospital** (2021, team of 3) — a 600-bed hospital zoned by level of care across 17 floors and 2 basements, checked against bylaws (coverage, FAR, setbacks, parking), fire (30 m travel radius, 6 m tender loop, 120-minute pump house), stormwater (8 rainwater pits for a 651 m³/hr load) and solar radiation.
- **Gateway to Kerala** (2023, B.Arch thesis) — phase II mixed-use development at the Vytilla Mobility Hub, India's first multimodal transit hub: a podium tied to the metro concourse, office and service-apartment towers to ~150 m, and a public river edge.
- **Vytilla Junction** (2024, solo) — a junction redesign built from peak-hour PCU counts and signal capacity (every arm at 105–110%), folding the mobility hub, metro and water metro into one signal-free loop.
- **Lipi** — a Figma plugin (Figma Plugin API) that pressure-tests screens against Indic localisation.

EDUCATION

Master of Design (M.Des), Interaction Design | IDC School of Design, IIT Bombay | 2023 – 2025
CGPA 8.81/10 | **CEED All India Rank 4** | Teaching Assistant, Data Visualisation

Bachelor of Architecture (B.Arch) | School of Planning and Architecture (SPA), New Delhi | 2018 – 2023
CGPA 8.08/10 | Distinction | **Second Best Thesis** | Charles Correa Gold Medal Finalist

SKILLS

Architecture & AEC: site analysis, building bylaws and code checks (FAR, ground coverage, setbacks, parking), fire and egress planning, building services and stormwater design, solar radiation analysis, healthcare planning, urban and transit-oriented design, traffic analysis (PCU, signal capacity), IFC and BIM data.
AI & Product Design: LLM and agentic UX, AI trust and evidence design, end-to-end product design, user research, usability testing, information architecture, interaction design, prototyping, design systems, service design, data visualisation, WCAG accessibility.
Technical: HTML, CSS, JavaScript, TypeScript, React, three.js, IFC (web-ifc), property-based testing, Figma Plugin API, AI-assisted development (Claude, Cursor, v0).
AEC Tools: AutoCAD, Revit, Rhino, Grasshopper, SketchUp, Ecotect, Ladybug Tools (environmental simulation), Lumion.
Design Tools: Figma (expert), FigJam, Miro, Adobe Creative Cloud, ProtoPie, Framer, Jira.
